

# Scandinavian Steel AB

## QUALITY AND ENVIRONMENTAL POLICY

**Scandinavian Steel AB** is a world wide distributor in Ferro alloys and metals. All handling of materials, i.e. transportation, warehousing and processing, is done by our suppliers.

As a competent long-term reliable and flexible distributor within the Steel, Metal and Foundry industry we will fulfil the following:

- Timely deliveries of contractual quality material, supported by well chosen representatives for transportation. For storage of products we are cooperating with authorized warehouses.
- Professional knowledge of the business with constantly updated information of all products from publications and exchanges and regular contact with the market.
- Reliable access to a wide assortment of products by acting as an independent distributor of raw materials from producers throughout the world. Processing of raw materials on conversion basis is part of the company aim to secure product supply and good quality.

In our daily work we aim to minimize the environmental damage. This is achieved by a careful selection of partners and continuous work for an efficient energy usage.

**Scandinavian Steel AB** shall always comply with applicable regulations and requirements. Continuous improvement is achieved through our Quality and Environmental Management System, which is certified according to ISO 9001 respectively ISO 14001.

Stockholm, May 2012
