

Scandinavian Steel AB

BUSINESS POLICY

Scandinavian Steel is a leading distributor of metals and ferro alloys with worldwide distribution. Our business plan is covering a broad range of products, activities and geographical areas in the raw material chain with focus on the steel industry.

Our presence and our vast experience in the international market has given our company a core competence and a solid knowledge of the industry.

Our management system should always improve in order ensure:

- Efficient operations that gives also our customers added value
- Minimizing our environmental impact when sourcing raw materials including transports.
- Safe and healthy working conditions preventing work-related injuries and illness.

Our processes shall match our customer demands and needs, contractual specifications as well as laws and other requirements.

Our market knowledge and our short and effective decision paths helps us take advantage of business opportunities. In order deliver the right product at the right price and at the right time we are building long and prosperous relationships with customers, suppliers and transport companies.

For all transport companies we work with we demand that they are actively working with their processes to lower the environmental impact from transports we order from them.

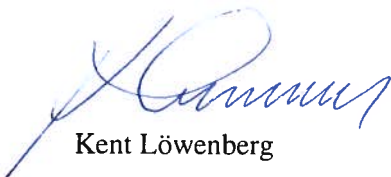

Scandinavian Steel is also part of research of environmental impact for the products we distribute through membership in REACH consortiums.

We work together with our suppliers to promote social and environmental sustainability in our supply chains.

We aim to be a long-term and attractive employer. We have a preventive work environment in which we identify risks and act upon them. Employees points and wishes shall be met. We shall encourage good health through wellness. We do not accept abusive discrimination in our workplace.

We have regular improvement meetings in which we discuss quality, environment & work-environment we also have company meetings with information and reconciliation for all employees.
